SCV
PROJECTS

Ultrasonic Measurement Project

- Reducing water losses in apartment buildings;
- Smart data management;
- Optimising internal resources;
- Revenue from precision, „drippers“, technical omissions.

Pipe Maintenance to Ensure Water Quality (I)

Pipe Maintenance to Ensure Water Quality (II)

Neterštukas („Water hero“)

2024 last quarter was busy and our hero who visited 19 kindergartens and primary schools in Vilnius, where he met more than **1,2 thousand children.**

Through educational lessons, children learned where water comes from, why it is important to conserve it and what waste should not be thrown down the drain.

The fun part? Many children already have a good understanding of responsible consumption and want to apply it in their daily lives

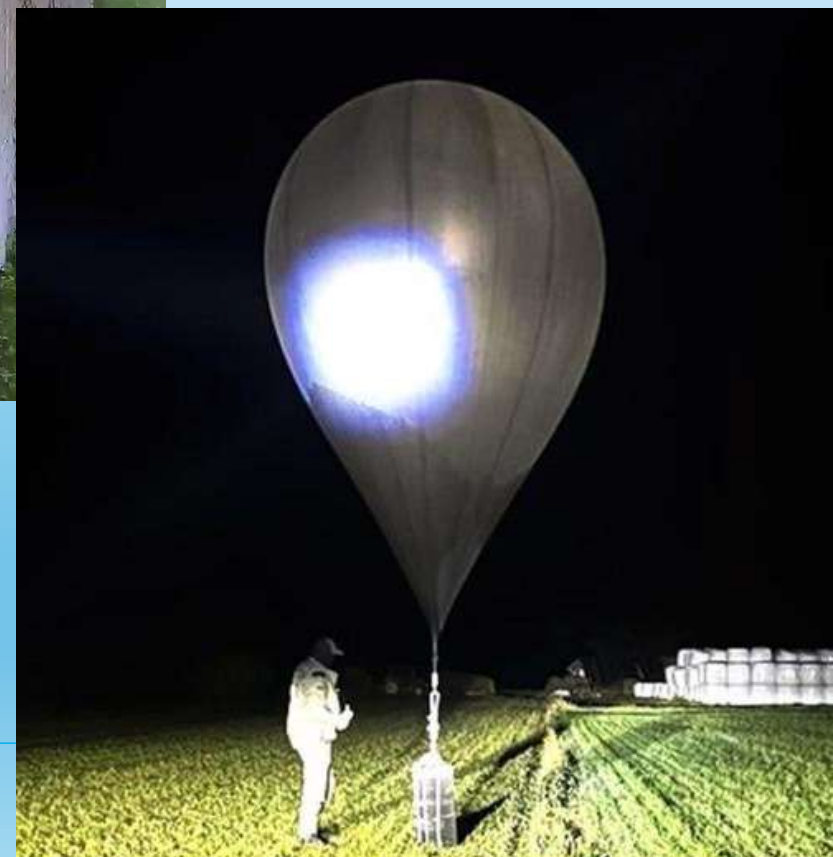

Action in the city: vital water

- The campaign focused on strengthening and publicising the network of **48 fixed and mobile water stations** to increase their visibility in the city and encourage Vilnius residents to choose clean, healthy and sustainable alternatives to tap water. The water stations have become an integral element of the campaign, symbolising the commitment to the vitality and sustainability of the city.
- Live concerts and other interactions were to take place in the vicinity of the water stops, and in their absence, **water trucks and mobile water tanks** from „Vilniaus vandenys“ were used.
- Throughout the warm season, Vilnius residents and visitors drank **4.2 million glasses of water** from the water stations.

Apibendrintas vertinimas: (Executive Summary)	2023-07-11 dieną kibernetinis aktyvumas išlieka aukštas. Fiksuojamos pavienės kibernetinės atakos į įvairias neapsaugotas sistemas, pagrindinis taikinyš šiuo metu yra privatus sektorius. Šios atakos sukelia laikinus nepatogumus, į jas yra reaguojama pakankamai greitai. “NoName057(16)” Gruputė savo Telegram kanale mini DDoS atakas prieš šiuos taikinius:
	- Vilniaus Miesto paslaugų tiekėjo portalas https://www.grinda.lt - Vilniaus Vandenys https://www.vv.lt - Vilniaus Energija https://www.vilniausenergija.lt - Vilniaus Apšvietimas https://citylight.vilniausapsvietimas.lt/ 2023-07-11 10:56 Konferencijų Centras Litexpo https://www.litexpo.lt. Čia vyksta NATO Viršūnių susitikimas. 2023-07-11 11:27 paskelbė sutrikdžius portalą https://nato.vilnius.lt/ bet portalas saugomas, CDN sistemos veikia. 2023-07-11 12:03 Sutrikdytas NATO multimedia portalas www.natomultimedia.tv 2023-07-11-12:45 Sutrikdyta AEW&C program management agency https://www.napma.nato.int/ portalo veikla. 2023-07-11 13:22 sutrikdyta Information and Analytical Center for Ammunition Safety (MSIAC) portalo veikla https://portal.msiac.nato.int/ 2023-07-11 14:23 NATO subsidiary body portalas sutrikdytas https://www.sto.nato.int. Taip pat Rusų gruputė NoName057(16) publikuoja straipsnių nuotraukas iš Lietuvos naujienų portalų www.tv3.lt ir www.respublika.lt apie tai, kokias pasekmes sukėlė DDoS atakos.

Open for communities

- Antaviliai waterworks is one of the main facilities supplying the capital of the country with clean drinking water from deep boreholes.
- Vilnius Sewage Treatment Plant - the country's largest sewage treatment plant - plays an important role in protecting the environment and returning water treated to the highest environmental standards back to nature.
- The unique heritage of the Liepkalnis Water Storage Facility
